Skills

Computer skills: Python, Django, Mysql, PostgreSQL, Javascript, Express

Soft Skills: Team Player, Self-taught, Work Ethic

Basic: C#, AWS, Docker, Lambda

Languages: Spanish Native, English Intermediate B2

Education

Silabuz / Apprenticeship

OCTOBER 2022 - MARCH 2023, PERU

During my time in Silabuz I created web projects using:

- Programming languages like Python, including the use of annotations. JavaScript and TypeScript for front-end and back-end application development.
- Relational databases (MySQL, Postgres) and NoSQL databases (MongoDB).
- Frameworks Django and Flask in Python, and Express and Node in JavaScript/TypeScript for web application development.
- AWS services, such as S3, EC2, and AWS Lambda, for deploying and maintaining cloud applications.
- Integrations: Ability to integrate payment gateways into web applications, which allows users to carry out secure transactions.
- Collaborative work: Ability to work with code repositories using GitHub and pull requests to collaborate with other developers.

Platzi / Student

JANUARY 2022- PRESENT

In Platzi I learned and I am still learning about programming and software development. I learned about:

- Use of the CLI(Console Command Interface)
- OOP(Object Oriented Programming)
- SQL and NoSQL Databases
- Algorithms

Projects

Passecure (Password Manager) / Silabuz project in teams

Secure and validated password management system by SMS and EMAIL.

- Typescript, React, Express, Nodejs frontend and backend
- MySQL, Prisma (database and ORM)
- Twilio
- Vercel to deploy the app
